AI Market Twin – Investor Proposal

Cover

AI Market Twin
Predict product success before launch using AI consumer simulation.

---

1. Problem

Companies launch products with limited certainty. Common decisions are still based on intuition:

- Which country should we enter first?
- What price point will convert best?
- Which creative message will perform?
- Who is the highest-value customer?
- What is the probability of failure?

Traditional research methods are slow, expensive, and limited in scale.

---

2. Solution

AI Market Twin creates a virtual market environment with 10,000+ AI personas and simulates real-world reactions before launch.

We help businesses test:

- Product positioning n- Pricing strategy
- Ad creatives
- Target audience fit
- Country expansion strategy
- Revenue potential
- Failure risk

---

3. Product Overview
